

Why Choose Global Net?

Your organization depends on Internet access to interact with your customers, suppliers and partners. Our goal is to provide you with the most reliable, best-performing Internet access possible.

We are a customer-focused organization committed to tailoring solutions that exceed your expectations. That commitment translates into a compelling set of reasons to do business with us.

IP Powered Network - Our combination ATM and IP Powered Network transmits more information faster, reducing overhead and increasing throughput 19% to 24% beyond traditional circuit-based frame relay networks.

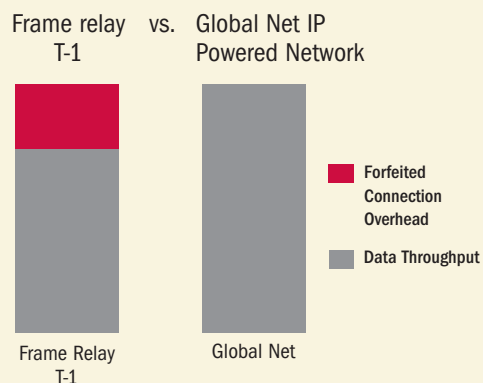

Typically, 15% to 19% of the data throughput for a frame relay connection is consumed for such tasks as circuit synchronization, signaling, and transmission overhead. Global Net's IP Powered Network doesn't use any of

your connection capacity for signaling or synchronization. For example, on a 1.54 Mbps frame relay T-1 you would sacrifice almost 300 Kbps due to transmission overhead. That would leave you

with maximum data throughput capacity of 1.2 Mbps. By comparison, Global Net's IP Powered Network will provide you with 1.54 Mbps of pure data throughput, 124% of the data throughput of a T-1.

Data Throughput Comparison

Features and Benefits

Business Client Services support. We understand that your ability to interact with customers, suppliers, and other partners is critical to the success of your business. That's why we have a dedicated Business Client Services team to assist you with any support needs that you have.

Network monitoring. You enjoy the optional security of having us monitor your connection to resolve potential issues before they become problems.

Scalability "on-demand". With most of our solutions, you can scale your bandwidth dynamically within 24 hours.

VPN friendly. Our business class services enable VPN connections. If you require a static IP address to facilitate your VPN, we can provide one for you.

Premium service and reliability at an affordable price. Our solutions offer the service and reliability that your operations team requires, but at prices that will please your accountant.

Dedicated project management. As a business client, you can contact a Global Net Account Manager to assist you with the implementation of your service, ensuring that each task is completed on time and to your specifications.

Data, voice, and video capable. Our IP Powered Network supports all types of IP traffic including data, voice, and video. We'll help you navigate through the issues to decide how best to prioritize and co-mingle your various types of information.

Redundant solutions. If it's critical for you to have redundant data paths, we can engineer a solution that provides redundant connections using redundant hardware and network components.

Wide spectrum of bandwidth options. Our customized solutions start with speeds of 512 Kbps and allow the flexibility to migrate up to 5 Mbps.

Customized Solution. Our account management teams have the experience to create a customized solution to meet all of your requirements.
