

# SMALL BUSINESS

## RELIABLE BROADBAND

**Global Net Business Services** are designed to meet your organization's demanding needs. All too often your options are limited — you may have to start out with more or less than you need and the options for changes are not always customer friendly. We'll create the correct solution, right from the start.

Your search for a reliable, high-performance broadband connection at a reasonable price, is over with Global Net Business Services. Our solutions are focused on delivering the flexibility you need with the service and support you require. We specialize in the ability to deliver high performance, IP based services to areas where traditional carriers fall short.

**Premium service and reliability at an affordable price.** Our solutions offer the service and reliability that your operations team requires, but at prices that will please your accountant.

**Dedicated bandwidth.** Available bandwidth that you can count on.

**IP Powered Network.** Global Net's IP Powered Network transmits more information faster, reducing overhead and increasing data throughput 18% to 24% beyond traditional circuit-based frame relay networks.

**Scalability "on-demand".** Most of our Commercial solutions offer you the ability to scale your bandwidth dynamically within 24 hours.

**Network monitoring.** You enjoy the optional security of having us monitor your connection to resolve potential issues before they become problems.

**Redundant solutions.** If it's critical to have redundant data paths, we have the right solution for you. We can engineer a solution that provides redundant connections using redundant hardware and network components.

GLOBAL NET, INC.

- **Wide spectrum of bandwidth options.** Our customized solutions start with speeds of 1024Kbps and allow the flexibility to migrate up to 5Mbps.
- **Customized Solution.** You pick the router that fits your needs. Global net provides the Ethernet access. Our account management teams have the experience to create a customized solution to meet all of your requirements.
- **Dedicated project management.** As a business client, you can contact a Global Net Account Manager to assist you with the implementation of your service, ensuring that each task is completed on time and to your specifications.
- **Data, voice, and video capable.** Our All IP Network, supports all types of IP traffic including data, voice, and video. We'll help you navigate through the issues to decide how best to prioritize and co-mingle your various types of information.
- **Active system monitoring.** We actively monitor our network backbone to make sure that it is optimally performing. Our strategy to do this is two-fold. First, we actively manage our network performance from our network operations center (NOC). Second, we perform preventative maintenance on a regular basis to all of our network points-of-presence (POPs).
